
TIRE INFLATION SYSTEM TO SERVICE CENTER

CHARACTERISTICS:

- Base plastic reinforced with fiberglass.
- Unit of measurement in high impact injection molded plastic - vandal proof. (Just try hammer).
- LCD display with 1 "inch tall, high definition and with back-light illumination; optimal for night vision.
- Keyboard with rigid polycarbonate and totally waterproof buttons.
- Calibration Unit completely waterproof and dust (degree of protection IP-65).
- Unit Modular Calibration - easily removable base for maintenance.
- Power supply "Full-range" with automatic voltage selection for 110V and 220V.
- Safety excess pressure and electrical shock. Warns when calibration errors, shortness of breath or power failure.
- Easy operation, sound and light alarm.
- High airflow.
- Long operating temperature range, working externally under the sun, in high and low temperatures.
- Valves and electronic board fireproof.
- It has 2 pressure ranges: 58 to 145 psi.
- It is produced by Super-Air, a world leader in pneumatic calibration technology.
- The Futura line is exported to all continents.
